

Installation Details

Location: Anhui Conch Holdings Co., Ltd.
www.chinaconch.com

Model:  S25

Area: Cooling water for hazardous waste treatment process

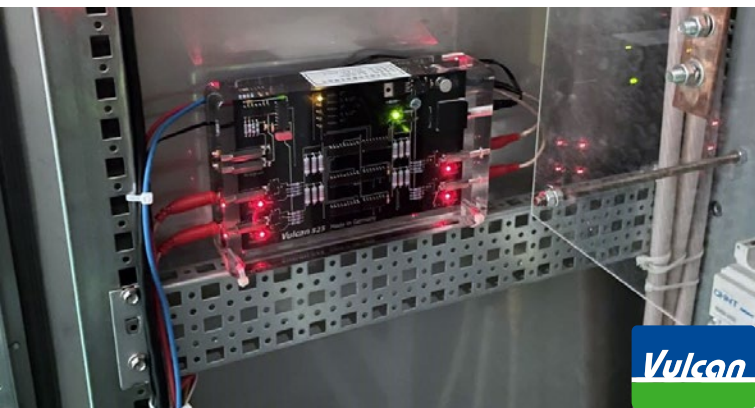

Problem: The heat exchanger of the cooling water system was heavily scaled and required regular manual disassembly of the pipes for cleaning every year.

Result: After **6 months** of installation, the factory data center platform showed that the heat exchanger temperature still did not rise, so it can be determined that there is no new scale.

Installed by: Xinriyuan Company

The pump room of the hazardous waste treatment plant
