

# Bihai Yuntian Leisure Bathing Center

**Installation model:**

Vulcan 5000

**Installation location:**

Bihai Yuntian Leisure Bathing Center

**Installed by:**

Kang'er Environmental Protection Technology Co. Ltd

**Installation area:**

The Vulcan 5000 was installed on the main water pipe in the bath center for two separate pipelines: one flows for solving the scaling problems of the hot water boiler and heat exchanger; the other flows for solving the scaling problems of water supply systems, solar water heaters, bathing water, rooms, basins, toilets, shower heads.

**After Vulcan installation:**

We stopped the water softener on the day of Vulcan was installed. After 45 days of installation, the effect was very obvious: the old scale in the hot water pipe became softer and easy to clean.

**About Bihai Yuntian Leisure Bathing Center:**

Located in Shandong province in China, there are 30 rooms, 1 bath room for men and 1 bath room for women.

The Vulcan 5000 was installed on the main water pipe in the bath center.
