

Installation Details

Location: Burnbrae Farms
Saint-Zotique, Québec,
Canada

Model:  S10 x 2

Area: Whole piping system

Installed by: Gestion L.B. Inc

BURNBRAE FARMS

In 1891, from its early beginnings as a dairy farm, Burnbrae Farms evolved into egg production in the '40s. Over the following decades, Burnbrae Farms became an established and integral part of Canadian agribusiness, offering innovative products such as omelettes, liquid and hard-boiled eggs. Today, Burnbrae Farms eggs and egg products can be found in the local grocery store, restaurants, food-service operations and homes across Canada.
