Installed by:
Dalian Jiayifang Water Technology Co., Ltd.

About Jinzhou No.2 People's Hospital

The hospital is located in Jinzhou New District. It provides the public health and basic medical services for more than 40,000 people. It is also responsible for emergency tasks of 200,000 people in eastern Jinzhou.

The water of the hospital is coming from the ground, so the water hardness is very high. The entire piping system and equipment have a lot of scale.

After Vulcan was installed for two months, by observing the faucet, we found the scale was reduced in the pipe and equipment and the water feels softer.

Vulcan S10 installed on the main water outlet pipe.
