Vulcan 3000 Service Report

Dear Sir,

A few months ago we installed your Vulcan 3000 water treatment system in our catering services at the Cologne trade fair. In recent years we have had problems in particular with the coffee machines and dishwashers due to the hard water in Cologne.

The machines had to be maintained frequently and the cleaning costs of the kitchens were very high.

After the installation of your water treatment system in our bistros I noticed a clear improvement of the situation. The limescale deposits are now much easier to remove thus easing the workload of the staff. Less detergents are needed and I am altogether extremely satisfied with your device.

Unfortunately I am unable to give a long-term conclusion over the scale reduction at this point in time as it is not possible to see inside the pipes. I am convinced However by the effects visible outside the pipes and can therefore fully recommend Vulcan.

Yours Sincerely,

A handwritten signature in black ink, appearing to read "Gabor Ernochazai".
