

*To Bevan:*

*Our brick factory have installed Vulcan for a month and the effect was obvious.*

*The inlet water temperature is 49.5 °C, and the spray reaction temperature is 120-140 °C. Vulcan has a significant effect on the prevention of scaling, and the blockage from the nozzles and the branch pipes has been reduced by 50%.*

*Foshan Brick Factory*

The FGD plant before Vulcan was installed.

With Vulcan for 25 days, the scaling situation has already been greatly improved.
