

## Installation Details

Location: Huaxin Plastic  
www.sdhxsj.com

Effect: Vulcan has completely replaced the water softeners in all workshops.

## Huaxin Plastic

Located in Shandong Province, it is one of the largest professional manufacturers of plastic pipes in northern China.

### Installation 1

Location: Extrusion production line, Workshop 1

Model: **Vulcan** S250

Purpose: To solve the scaling problems of 12 extrusion production lines, vacuum water tanks and nozzles

Result: Without Vulcan, the nozzles needed to be cleaned every 15 days. **30 days** after installing the Vulcan S250, **no new scale formation** was seen on the nozzles.

12 extrusion production lines

Vulcan S250 outdoor installation

### Installation 2

Location: Extrusion production line, Workshop 2

Model: **Vulcan** S150

Purpose: To solve the scaling problems of the extrusion production lines, the vacuum water tanks and the nozzles.

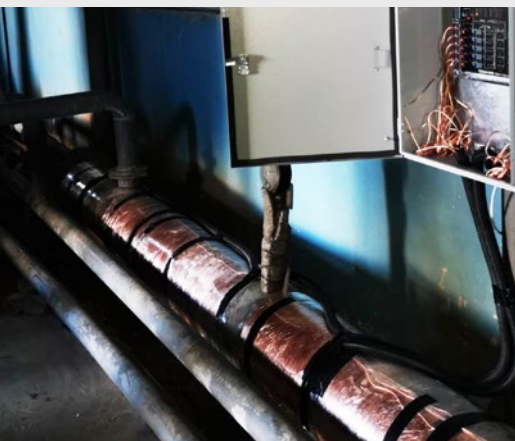

### Installation 3

Location: Extrusion production line, Workshop 3

Model: **Vulcan** S500

Purpose: To solve the scaling problems of the extrusion production lines, the vacuum water tanks and the nozzles.

### Installation 4

Location: Extrusion production line, Workshop 4

Model: **Vulcan** S250

Purpose: To solve the scaling problems of the extrusion production lines and the mold tools.

### Installation 5

Location: Extrusion production line, Workshop 5

Model: **Vulcan** S500

Purpose: To solve the scaling problems of the extrusion production lines, the vacuum water tanks and the nozzles.
