| Pipe size:      | 200 mm   |
| Water capacity: | 290 m <sup>3</sup> /h  |
| Installed by:   | Vulcan-Korea team  |

The Korea Water Resources Corporation, or K-water, was established in 1967, is the governmental agency for comprehensive water resource development and providing both public and industrial water in South Korea. The duties include construction, operation, and management of facilities for the comprehensive use and development of water resources, etc.

## Scale problem and application

K-water has been in contact with Vulcan-Korea team's customers such as Hyundai Motor Company, Toray Industries. Since Vulcan has positive effects on those applications, K-water decided to install Vulcan S250 as the anti-scale solution.

Vulcan S250 installed at K-water
