

Laiyuan Lakeside Hotel

Installation Details

Location: Laiyuan Lakeside Hotel

Area/Model: • **Vulcan S25** treats the hot water recirculating pump in the hotel.

• **Vulcan S10** treats the hot water supply system in the hotel.

➔ After 3 months, the customer reported good results. The heat pump has been running efficiently, the pipes are staying clean, and no new scale has formed on the shower heads or hot water faucets. Vulcan has completely replaced the water softener in an eco-friendly way.

• Therefore, an extra **Vulcan S25** was purchased to deal with the scaling problem of the heat pump condenser in the concrete mixing plant and to ensure the smooth flow of circulating water.

Laiyuan Lakeside Hotel

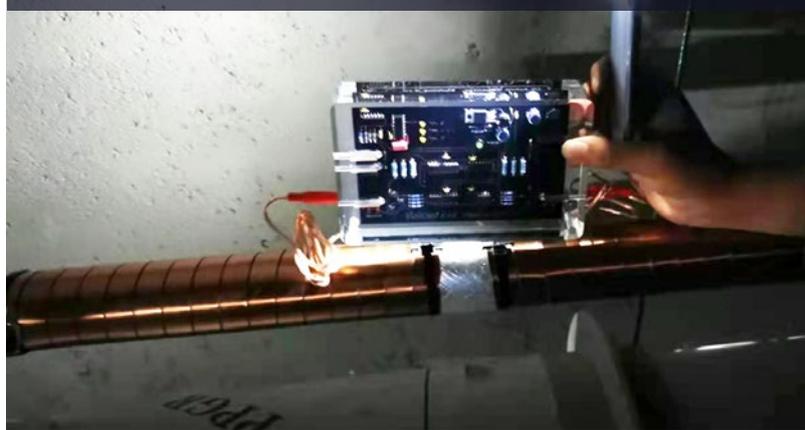

Laiyuan Lakeside Hotel is a comprehensive tourism hotel integrating high-end rooms, special dining, wellness and health care. It forms a beautiful scenery line with Laiyuan Lake.
