About Lijun Chinese Medicine

Lijun Chinese Medicine has a long history of more than 300 years. The company was formerly known as "Hengxintang Pharmacy", which was founded in the late Ming Dynasty. Nowadays, it specializes in R&D, production and sales of Chinese medicines.

Scaling problems

In the process of producing traditional Chinese medicines, it is necessary to cool the liquid. Since the plate was scaled badly and affected the heat exchange efficiency of the condenser, it was necessary to open the plate for cleaning every six months.

The cooling tank of Chinese medicine liquid.

The Vulcan S150 was installed on the main circulation pipe to solve the scaling problems of the plate heat exchanger.
