

Installation details

Location: Jinlin Garden Community, Inner Mongolia

Model:  Vulcan 3000

Installation area: Water main of a private home

Pipe size: 25 mm

Purpose: The water heater and the water guns were blocked by scale

Installed by: Dalian Jiayifang

Installation effect

Before Vulcan was installed, the water gun was blocked by the scale for about 2/3, and it took 5 minutes to get a basin of hot water from the heater.

After installing V3000 for 3 weeks, it took only 3 minutes to get a basin of hot water.

After 3 months, the water volume from the water gun has been increased and finally stays the normal condition now.

Jinlin Garden Community

Vulcan 3000 was installed in the main inlet of the home.

Before installation: the water gun has been blocked by the scale for about 2/3.

After installing V3000 for 3 weeks: the water volume from the gun has been increased.
