

Installation Details

Location: Randa food factory
Tunisia

Model: Vulcan S150

Water capacity: 180 m³/h

Area: Cooling tower

Installer: STPE+

RANDA is a Tunisian company specializing in the processing of durum wheat into semolina and semolina into finished products (pasta, couscous, flour and barley derivatives) for more than three decades.

The Vulcan S150 unit was installed in the outdoor case and the impulse bands were covered by the plastic foil against humidity.
