

Shengda Home Community

Installation details

Model: Vulcan 3000

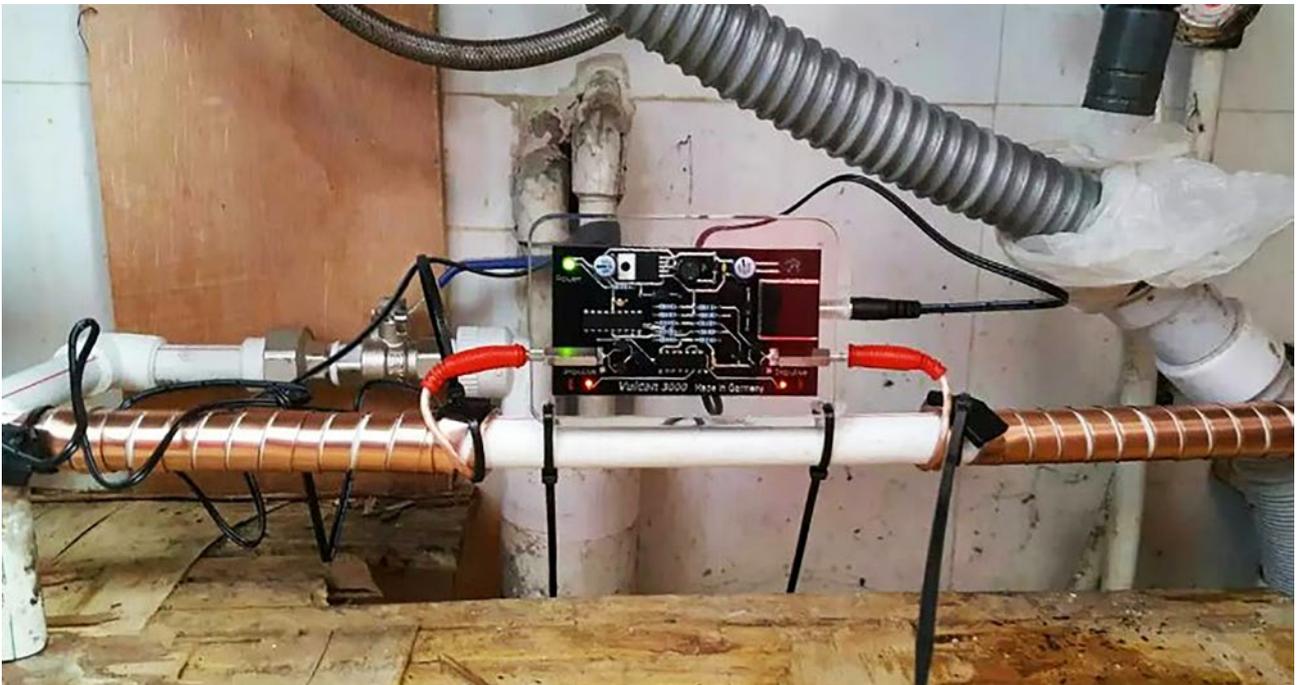

Location: A family in Shengda Home Community

Area: Main household water pipeline

Installed by: Jiayifang

Observation

Shengda Home Community is located in Beipiao City, Liaoning Province. The water hardness is high, which leads to serious scaling problems in households. The water pipe of the solar water heater was often blocked. After installing Vulcan 3000 for 3 months, we found the water heater pipe was no longer blocked, and the water flow became very smooth.

Vulcan 3000 was installed on the main water pipe for a residence.
