## **Vulcan 3000 electronic anti-scale system**

This is a statement from The Norwegian Seamen's Church in Los Angeles / San Pedro after we have used the Vulcan 3000 anti-scale system for a few months. We replaced a water softener system which used salt and special filtering system, as it was very expensive to maintain and it covered only part of the water system.

We decided to replace the water softener with the Vulcan Descaler 3000 unit. The result now is amazing, the clogging of the shower nozzles is gone, and the kitchen faucet nozzles are spraying evenly and our commercial grade dishwasher is cleaner and works better. We use a lot less detergent when doing laundry as the Vulcan 3000 makes the detergent work so much better.

Best regards
