

Installation details

Installation location: The Institute of Contemporary China Studies

Installation model:  Vulcan 5000

Purpose:

- To solve the scaling problems of the boiler in a domestic hot water system, to extend cleaning intervals and to improve boiler operating efficiency
- To solve hot water tank scaling problems

Installed by: Beijing Vulcan Water Environment Science & Technology Co. Ltd.

The Institute of Contemporary China Studies

In 1990, the institute was approved by the central China government to edit, research and publish the history of the People's Republic of China. It is currently managed by the Chinese Academy of Social Sciences.

Vulcan 5000 was installed in a heat supply station to treat daily life water for solving scaling problems in the boiler and hot water tank.

The front door of the Institute of Contemporary China Studies.
